Traction Services

Providing dedicated drivers and reliable vehicles to reduce your overheads

Driving Talent Ltd offer one of the most professional traction services In the East midlands, we supply a modern, clean fleet of vehicles that are driven by professional drivers that have been fully assessed at our HQ in the heart of Leicester. Our fleet is driven to support your business on a regular or adhoc basis.

We have built strong local relationships with our traction services and currently have a number of vehicles out regularly completing all types of work including general trunking, store drops, timed deliveries and specialist that require ADR, Moffett or HIAB. Our vehicles work around the clock to ensure our clients' needs are met to a high standard.

With our flexibility available to business we can tailor our traction services to your needs this also includes our insurances, already have a goods in transit and freight insurance which can be changed to met with your requirements.

Driving Talent are extremely proud of the fleet we provide and the up-keep to make sure it continues to run smoothly and efficiently. We understand that any fleet, of any standard, requires the knowledge and hard-work to maintain it.

Below you will find all the information needed to understand more about our fleet and how Driving Talent preserve it.

Vehicles

We have a modern fleet of tractor units available at our disposable and ready to meet your requirements, including a mixture of Volvo, Globe Trotter and Mercedes Attros. All of our vehicles are a 68 plate registration and in full white colour.

Height: 16 x 2

Weight: 44 tonne

Maintenance

Driving Talent have access to on-site workshop facilities at our head-office. We also have further cover through business supplier, Marcol (more below).

O Licence

We have an O licence which covers our entire fleet.

Breakdown Cover

Please see below breakdown cover provided by Marcol:

Breakdowns.

We have a 24 hour breakdown line. This goes through to our office in the daytime, in which it's best to ask for the fleet department. It's then diverted to a member of our team after 6pm and we will be on call throughout the night. We'll try to diagnose faults over the phone where applicable to avoid waiting for a repairer, however when this isn't possible we will call a breakdown company to attend.

We have repairers all over the country so we can get it sorted in the vast majority of places. Depending on the severity we will get it repaired roadside but in the rare occasion that recovery is required we will either get the vehicle into the nearest garage or get it back to Leicester. A replacement may be supplied if required.

Standard ETA for all repairers is 60-90 minutes depending on location and traffic etc. The breakdown number is 01509 881 644. All breakdown details will be on a fixed sign in the cab of each truck.

Tyres

Tyres are very similar to breakdowns in the respect that the call out time is 60-90 minutes. We are on a contract with Bridgestone so we must be aware of all tyre defects so we can arrange the job to be completed by them. We carry out all tyre replacements at operating depot's and also have a roadside facility in the event of a blow out or if the tyre is not road worthy.

PMI's & Servicing

We schedule PMI's on a 6 week cycle. We are happy for you to inspect our vehicles and charge us accordingly. Alternatively we can arrange for an inspection to be done onsite or to be booked in at a local garage. We tend to email a week before to optimise time in getting this arranged.

Response Time

Flat rate of 60-90 minutes. This may be quicker but sometimes may be longer but we'll work hard to avoid that happening.

VOR Vehicles

If a vehicle becomes 'VOR' we should be able to supply a replacement depending on the availability in our fleet. As you're not far away we can help you as much as possible with this.

Driving Talent provide all of their staff with everything they require to ensure the job is done to the very high standard we demand. Through this, we believe Driving Talent allow all staff, in particular drivers, to achieve a consistent level of performance on a daily basis.

Please find below a list of resources available to all Driving Talent driving staff and the resources Driving Talent will provide their clients with:

Assessments

Driving Talent conduct extremely thorough driving assessments with each and every driving member of staff. These assessments are conducted by either John Brownhill (Training Manager) or a competent member of the training team.

Driving Licences

All driving licences are dealt with in the same manner and will be systematically checked for accidents, points and more. Once deemed appropriate to become a member of our traction services team, a copy of the licence will be sent to our clients for further inspection.

DVSA Checks

We will conduct 6 week PMI inspections and use Driving Talent vehicle technicians or reputable local business suppliers.

Workwear/ Personal Protective Equipment (PPE)

Driving Talent work closely with local workwear business, WorkStuff UK Ltd. Working with a local business allows for quicker delivery times and collection if required.

We provide all of our staff with the correct PPE to ensure maximum safety at all times.

Tacho Cards

Tacho cards are downloaded on a weekly basis. The vehicles are downloaded on a fortnightly basis. All are analysed through the tacho master system.

24/7 Contact Information

Driving Talent will have someone on stand-by either in the office or by mobile to answer any queries you may have. Our promise.
